

BREATHE EASY

Experience a Healthier Home

Breathe Easy

A clean home is a healthy home but you cannot clean what you CANNOT SEE.

The quality of the air we breathe in our home is impacted by many things such as cooking, mold, cleaning products, infectious viruses and allergens.

And while it is easy to see a dirty stovetop that needs cleaning, many of the things that impact air quality are hiding in hard to reach places like our HVAC and plumbing systems.

Legionella pnuemophila, Listeria monocytogenes, and Staphylococcus

Dirty Sock Syndrome

SARS-Co-V2 – the virus that causes COVID-19 and other emerging viral pathogens*

These include things like:

With Decon7 you can breathe easy knowing you have disinfected, sanitized and cleaned even the most hard to reach places in your home.

Mold and mildew

MICROBIAL GROW

A Deeper Clean with Decon7

In a single sneeze, as many as 200 million virus containing particles can be released into the air. The number of virus particles may easily overwhelmstandard household disinfectants.

D7 disinfectant is applied directly to the coils of your air handling equipment providing cleaning and disinfecting that will treat the critical portions of your HVAC system.

Dirty drains not only smell bad, they can be bad for your family's health. A musty smelling sink, shower, or dishwasher drain is typically caused by mold and bacterial growth.

These drains collect things such as hair, body oils, soap scum and food particles.

D7 is formulated to disinfect, sanitize and eliminate odors from drains in your kitchen and bathroom sinks, shower, tub and dishwasher drains.

Proprietary Formulation Features and Benefits

Traditional treatments for HVAC and plumbing systems use chemicals that are dangerous. Our sanitation technology uses hydrogen peroxide – a powerful sanitizer and decontaminant that is listed on the EPA's safer ingredient list.

KILLS PATHOGENS

Effective against viruses, bacteria, mold, fungi, and musty smells in your HVAC and plumbing systems.

EPA REGISTERED

One of the most effective in the market with disinfection efficacies up to 99.9999%.

SAFE FOR YOUR HOME

Our unique formulation is hydrogen peroxide-based and delivers low corrosion properties, making it safe on most surfaces in your home.

BROAD SPECTRUM

Formulated to treat both HVAC and plumbing systems in your home.

PROVEN EFFECTIVENESS

Developed by Sandia Labs and tested and validated by leading research and third-party independent laboratories.

What You Can Expect

In HVAC applications, D7 spray is applied directly to the coils located in the air handler portion of your HVAC system. It should be applied as part of your normal maintenance program and at a minimum of every six months.

In plumbing applications, D7 foam is administered directly into the drain system of the area to be treated.

It is normal for a slight odor to occur but it will dissipate within a few hours.

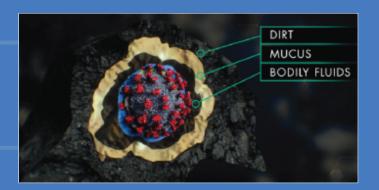

Are you ready to learn more about D7? Scan the QR code or visit our website at www.decon7.com to learn more.

D7 has been specially formulated to cut through dirt, dust and grease soils. This proprietary cleaner and disinfectant makes it possible to reach even the smallest nooks and crannies, allowing for a powerful cleaning and disinfecting solution.

D7 is only available through our authorized contractor network. Visit www.Decon7.com to find an authorized contractor.

Understanding proper application is as important as the product being used, your service technician has undergone specialized training to ensure the sanitizing of your HVAC systemis completed to the highest standards possible.
